

PRIVACYGUARD[®]

PRIVACYGUARD®

With PrivacyGuard® restricted vision mesh, anyone looking into your home will have limited vision while those inside the home will have minimal visual obstruction, allowing you to see what's going on outside.

Made from aluminium sheet, PrivacyGuard® uses a patented bonding system to retain the mesh.

DISCLAIMER

Restricted vision mesh functions during standard daylight hours when light transmission occurs from either side of the mesh. This mesh is subject to performance limitations at night when illuminated from inside.

Australian Tested & Manufactured

Custom Built, Made to Size

Triple-lock Locking System

Professionally Installed
